

Warehouse Performance Metrics

Critical to Tracking Your Productivity

Latitude Warehouse Metrics gives you on-demand access to warehouse performance, allowing you to create reports and charts to track employee and warehouse productivity. Latitude Metrics brings you visibility to activities such as picking, receiving, cycle counting, etc. and offers various sorting options - by branch, employee, error type, etc.

Wizards allow for easy data entry and the development of templates and graphs. And with a Metrics dashboard, you'll have all of your most important data in one location - automatically updating in real-time.

With Latitude Metrics, you can benchmark your progress and suggest the right tools, process changes, and improvements as needed to make your warehouse operations more efficient, productive, and profitable.
