

Coming soon to PathGuide's Latitude 9.0 WMS

Warehouse Performance Metrics Module — Critical to tracking your productivity

With Latitude Warehouse Metrics, you'll have on-demand access to warehouse performance. Easily create reports and charts to track employee and warehouse productivity. Latitude Metrics bring you visibility to activities (picking, receiving, cycle counting, etc.), by branch, employee, error type, etc.

Wizards allow for easy data entry and the development of templates and graphs. And with a Metrics dashboard, you'll have all of your most important data in one location – automatically updating in real time.

Thanks to Latitude Metrics, you can benchmark your progress and suggest the right tools, process changes, and improvements as needed to make your warehouse operations more efficient, productive, and profitable.

For more information about **Warehouse Metrics Module**, call PathGuide Technologies at 888-627-9797 or email BusinessDevelopment@pathguide.com.
